For the Coming Economic Crash

By Dr. T. M. Lamb

I think an Economic Collapse will happen very soon.

All economic pointers show it's coming and very soon. I know main stream media say we are headed for an "up-tick" in the economy by 2 to 3% and one economist predicts an increase by 4% - (Yea RIGHT).

The economy only grew by .01 % the last quarter of 2013 (their messaged numbers) and crashed to a NEGATIVE 2.9% for the first quarter of 2014 and will be a NEGATIVE number for the second quarter of 2014. Two quarters of Negative growth means you are entering a new Recession in this case a new DEPRESSION. A depression that will make the 30's look like a Sunday Church picnic. Are you ready? It's coming!

Our economy is in shambles, our manufacturing jobs have almost all gone to China, our housing market is in a terrible state, manufacturing is down, retail is in such shambles they are calling it a "retail apocalypse" . Major manufactures and major store chains across the nation are laying off not hundreds of people but THOUSANDS of people. Major chain stores are closing stores across America at a rate not seen since the Great Depression. Whole Malls are turning into Ghost Malls.

Have you seen the suburbs of Detroit, Flint, Cleveland, Toledo, Gary and many more in the Rust Belt? Not to long ago these were the centers of manufacturing, with good paying jobs for all. Now they have mile after mile of dilapidated homes and whole neighborhoods are raised to the ground. They look more like war zones than a suburb of say Detroit, and you can get killed there just as quick.

No one knows when for sure the Economic Collapse will happen. It could very well be triggered by an event from Europe, China or Japan they all have their own catastrophic economic problems to deal with. I know the 1st quarter of 2014 showed a 2.9% negative growth and July 30th a report will be released by the Federal Government that will show Negative Growth for the 2nd quarter. Economist the world

over conclude that 2 quarters back-to-back negative growth are indicative that we are entering a new recession.

Add all that to the fact that almost every Federal Agency including the FDA, the Post Office they are all arming themselves like it's Iwo Jima all over again. They are prepping for something big and I bet it is for the rioting that will start when American's find they NO longer have a free meal ticket or free income, coming from the government.

Think about it: posse comitatus has been repealed, now the military can patrol American streets (and enforce Martial Law) using American Armed Forces. Now thanks to NDAA they can arrest you, detain you, jail you without charges and hold you as long as they deem necessary. All with out any legal recourse left to you (LEGALLY). IS THIS AMERICA OR WHAT? And now the President has the legal authority to KILL American citizens at home or abroad who he deems a threat to National Security. Now I ask you. Are you scared yet?

Funny, but at no time in the history of the World has any country and group of countries been so precariously placed on the very edge of the abyss. Economic collapse, Nature and natural collapse, societal collapse, morality collapse, family collapse, states collapse and nations collapse, wars and rumors of wars, signs in the heaven and upon the earth. At no time in History has ALL the signs prophesied in the Bible come together so intricately. Just as it says in the Bible to signal the beginning of Tribulation, the One World Government, the One Currency, the Antichrist, Armageddon and the end of man and the return of Jesus Christ.

Funny but when you watch CNN, MSNBC, CBS, ABC, FOX News etc. They all tell you how great our economy is doing the stock market is up, unemployment is low and we are starting to grow our economy back from the brink. So they say. BUT the truth is VERY frightening

because the Government makes up the numbers , (in other words THEY LIE) the true unemployment of the United States is more like 25% (More than the Great Depression). The national inflation is more like 10 to 14 % NOT the 2% they tell you, WHY? Because the Government does not factor in energy or food costs in figuring inflation, that is how they keep the numbers low. When figuring unemployment they do not count people who are not on unemployment, have dropped off unemployment, found part time work or accepted jobs far beneath their education and training. What does it say about our economy when you have hamburger cooks at McDonald's who have Masters degrees. That is a sure sign something is seriously wrong in America Today, (but CNN still don't see it).

Just recently our stock market has shown signs of cracking from the strain of too much money being printed and pumped into our economy. Where is it written that a losing company like Twitter is valued at one billion plus, the stock price has been going up and up and up (for a losing company that has NEVER turned a profit). But NOW that signs of the crack in Wall St. as stocks are now being decimated and will return to a more normal price but NOT before stocks take about a 50% hit. Yes it will be a blood bath, and they just may not stoop at 50% they very well could drop to 10% of their current value. The insanity that was the stock market is just now showing signs that it's about to all come crashing down and who knows where the bottom will be.

It's common knowledge among bankers that if and when the interest hits 3 ½ % on the 10 year Treasury Bond that will signal investors that the FED has lost control of interest for it and then Derivatives will start kicking in. It was not too many years ago that the interest on the 10 year note was 6 and 7%, and was as low as 1% but now it's flirting with 3% and slowly rising. Derivatives are just a fancy word for a bet, someone is betting on something. And IF the 10 year

note hits 6% all bets are off cause that will trigger about 200 Trillion Dollars due on Derivatives being held by investors. Where are our top 10 banks going to get 200 TRILLION DOLLARS. They will get it from the Government, from you (or your accounts, IRA's, Retirement Accounts, Pension Funds, Savings Accounts, anywhere they can) but certainly NOT from them. Remember they are TO BIG TO FAIL. So you and the Federal Government will bail them out...

Now that Obama care has been made law of the land. Many doctors are stating they are leaving the practice of medicine as they will not be told what the can and can not earn, who they will treat and be told what is best for their patients. You find more and more young people financing their education in hopes of a good job after they get out of school. They are gambling on their future, it use to be a safe bet to gamble on yourself but now with the economy in shambles no one is safe in any bet. Now the total bill for educational loans in America now totals over 1 TRILLION Dollars. When you take out a school loan, it's a loan you can NOT write off in a bankruptcy as you will STILL owe the money. And they will come after you with a heavy hand to get their money IF NEED BE.

GMO's (Genetically Modified Organisms) Monsanto and others in their infinite wisdom and love of playing God. Have developed GMO's for most if not all of our crops we grow here in America. Typically the well known crops like corn and wheat have been modified for years. Monsanto's reasoning is to make a stronger plant, a more temperature tolerant plant, a more drought tolerant plant, more bug and disease free plant and more yeild. But they also developed a seed that would only germinate once from their seen and not again from their crops seed. This way they could be guaranteed that you would have to come back year after year to buy MORE seed from them. This all sounds good but no long term studies have been conducted on these plants and the crops they produce, no studies have been done on the nutritional value of these crops, no studies

have been done to even see how these crops would effect other crops in the area. Now years later they have found that either by winds or by insects these GMO crops have had their pollen travel into nearby fields and infest the non-GMO crops. Now it is predicted in the next several years they will be NO – NON GMO crops available in America any longer. So these organic farmers you have been buying your produce from all these years will be soon selling GMO vegetables (unknowingly). And now Monsanto has been GIVING seed away FREE to farmers in Africa. Probably not telling them once they start they will have to come back year after year to buy their seed so they can start next years crop. Cause saving seed from their new crop will NOT grow, Monsanto has seen to that.

So the Federal Reserve is printing over 1 TRILLION Dollars and giving it away to the bankers per year that helps the stock market because that is where most of that free funny money goes is to buy stock, but that game is ending and soon enough. When you print that kind of money what do you think happens? The value of the money you have in your pocket or your bank account goes down and down and down.

^^^

Have you been paying attention to what has been happening in Argentina, Venezuela, Brazil, Ukraine, Turkey and China? If you are like most Americans, you have not been. Most Americans don't seem to really care too much about what is happening in the rest of the world, but they should. In major cities all over the globe right now, there is looting, violence, shortages of basic supplies, and runs on the banks. We are not at a "global crisis" stage yet, but things are getting worse with each passing day. For a while, I have felt that 2014 would turn out to be a major "turning point" for the global economy, and so far that is exactly what

it is turning out to be. The following are 20 early warning signs that we are rapidly approaching a global economic meltdown...

#1 The looting, violence and economic chaos that is happening in Argentina right now is a perfect example of what can happen [when you print too much money](#)...

For Dominga Kanaza, it wasn't just the soaring inflation or the weeklong blackouts or even the looting that frayed her nerves.

It was all of them combined.

At one point last month, the 37-year-old shop owner refused to open the metal shutters protecting her corner grocery in downtown Buenos Aires more than a few inches — just enough to sell soda to passersby on a sweltering summer day.

#2 The value of the Argentine Peso is [absolutely collapsing](#).

#3 Widespread shortages, looting and accelerating inflation are also causing huge problems [in Venezuela](#)...

Economic mismanagement in Venezuela has reached such a level that it risks inciting a violent popular reaction. Venezuela is experiencing declining export revenues, accelerating inflation and widespread shortages of basic consumer goods. At the same time, the Maduro administration has foreclosed peaceful options for Venezuelans to bring about a change in its current policies.

President Maduro, who came to power in a highly-contested election last April, has reacted to the economic crisis with interventionist and increasingly authoritarian measures. His recent orders to slash prices of goods sold in private businesses resulted in episodes of looting, which suggests a latent potential for violence. He has put the armed forces on the street to enforce his economic decrees, exposing them to popular discontent.

#4 In a stunning decision, the Venezuelan government has just announced that it has devalued the Bolivar [by more than 40 percent](#).

#5 Brazilian stocks [declined sharply](#) on Thursday. There is a tremendous amount of concern that the economic meltdown that is happening in Argentina is going to spill over into Brazil.

#6 Ukraine is rapidly [coming apart at the seams](#)...

A tense cease-fire was announced in Kiev on the fifth day of violence, with radical protesters and riot police holding their position. Opposition leaders are negotiating with the government, but doubts remain that they will be able to stop the rioters.

(Now Russian troops and/or sympathizers are now taking and holding Police Stations and other Government buildings in Eastern Ukraine. Seems everyone (USA, Russia, Europe and China are pushing for all out WWII over Ukraine. Now Russian bombers are flying off our West Coast and we have some 30,000 Russian and Chinese troops here in America, WHY?)

#7 It appears that a bank run has begun [in China](#)...

As [China's CNR reports](#), depositors in some of Yancheng City's largest farmers' co-operative mutual fund societies ("banks") have been **unable to withdraw "hundreds of millions" in deposits in the last few weeks**. "Everyone wants to borrow and no one wants to save," warned one 'salesperson', "and loan repayments are difficult to recover." There is **"no money" and the doors are locked**.

#8 Art Cashin of UBS is warning that credit markets in China "[may be broken](#)". For much more on this, please see my recent article entitled "[The \\$23 Trillion Credit Bubble In China Is Starting To Collapse – Global Financial Crisis Next?](#)"

#9 News that China's manufacturing sector is contracting [shook up financial markets](#) on Thursday...

Wall Street was rattled by a key reading on China's manufacturing which dropped below the key 50 level in January, according to HSBC. A reading below 50 on the HSBC flash manufacturing PMI suggests economic contraction.

#10 Japanese stocks experienced their biggest drop [in 7 months](#) on Thursday.

#11 The value of the Turkish Lira is [absolutely collapsing](#).

#12 The unemployment rate in France has risen for 9 quarters in a row and recently soared to [a new 16 year high](#).

#13 In Italy, the unemployment rate has soared to a brand new all-time record high of [12.7 percent](#).

#14 The unemployment rate in Spain is sitting at an all-time record high of [26.7 percent](#).

#15 This year, the Baltic Dry Index experienced [the largest two week post-holiday decline](#) that we have ever seen.

#16 Chipmaker Intel recently announced that it plans to eliminate [5,000 jobs](#) over the coming year.

#17 CNBC is reporting that U.S. retailers just experienced "[the worst holiday season since 2008](#)".

#18 A recent CNBC article stated that U.S. consumers should expect a "[tsunami](#)" of store closings in the retail industry...

Get ready for the next era in retail—one that will be characterized by far fewer shops and smaller stores.

On Tuesday, [Sears](#) said that it will shutter its flagship store in downtown Chicago in April. It's the latest of about 300 store closures in the U.S. that Sears has made since 2010. The news follows announcements earlier this month of multiple store closings from major department stores [J.C. Penney](#) and [Macy's](#).

Further signs of cuts in the industry came Wednesday, when [Target](#) said that it will eliminate 475 jobs worldwide, including some at its Minnesota headquarters, and not fill 700 empty positions.

#19 The U.S. Congress is facing another deadline to raise the debt ceiling [in February](#).

#20 The Dow fell by more than 170 points on Thursday. It is becoming increasingly likely that “the peak of the market” is now in the rear view mirror. (Unbelievably the Stock Market has again climbed to new highs with more injection of funny money but that will all come crashing down and soon.)

And I have not even mentioned the extreme drought that has caused the U.S. cattle herd to drop to [a 61 year low](#) or the nuclear radiation from Fukushima [that is washing up on the west coast](#).

In light of everything above, is there **anyone** out there that still wants to claim that “everything is going to be okay” for the global economy?

Sadly, most Americans are not even aware of most of these things.

All over the country today, the number one news headline is about [Justin Bieber](#). The mainstream media is absolutely obsessed with celebrity scandals, and so is a very large percentage of the U.S. population.

A great economic storm is rapidly approaching, and most people don't even seem to notice the storm clouds that are gathering on the horizon.

In the end, perhaps we will get what we deserve as a nation.

By Michael Snyder, on January 23rd, 2014 www.theeconomiccollapseblog.com

Matt Drudge, Issues Warning: “Have An Exit Plan”

Matt Drudge from the Drudge Report issues this Coptic short 4 word warning.

Some say Exit from what? I think it's a warning to be able to Exit from any and all the above.

Major U.S. Banks are NOW forcing customers to provide evidence for WHY they need their cash!

You would expect this in South America, maybe in Cyprus or even Europe but this is now hitting our shores. So be prepared, IF you take out a large sum of cash out of your bank, prepare to give them a reason why you need your cash. And IF you don't have a good enough reason they will NOT give you YOUR cash. After all it is your cash, you put it in their bank and now they may refuse to give it back to you on demand. Many say that is the first outward sign to the general public that a shortage of cash is rampant in our banking system and they are afraid of a bank run.

The Fed's Dirty Little Secret: “The Gold Isn't There... Exists as Paper IOU's” Fort Knox gold is missing. It's been sold, traded, invested but what ever – IT'S GONE.

The gold being held in the Federal Reserve Vaults in America around America that is owned by foreign governments is also missing. NOW many of these governments are demanding their gold back and NOW we are scrambling to get their gold together to return to them.

Example: Germany at the end of WW11 asked the New York Fed to store their gold, tons of it. NOW the German Government asked for their gold back and were told it would take 7 years to return it.

So far all they have received only a very small percentage and it wasn't even their gold and it took 4 years to get that small amount of gold. Their German gold had German markings on it and the gold they got back had new casting markings so they are being repaid with new gold replacing the gold they asked the fed to hold and store for them.

That is a very worrisome sign that they can not return the gold they gave them to store for them and the fact that it will take 7 years to get it all back. (if they ever get it all back). In just the last few days Germany has rescinded it's request for it's gold back. I guess they got tired of waiting... telling the FED they could hold their gold (since they were not going to get it back anyway).

You have paper gold which is a piece of paper that says you have so much gold in storage in a depository somewhere in your name. Then you have physical gold that is gold you own that you have in your physical possession.. And banks are notorious to sell this gold, take payment for it and then buy what they need in the future to fill orders for physical gold as needed. The problem with this is these banks can still carry this gold on their books and they can still charge you a storage fee for your gold – that they now no longer hold for you. Now in light of these facts why would anyone trust a bank to hold gold for them. When you need it – it just might not be there.

That's why there is such a difference in physical gold and paper gold. These Gold Bullion Banks are about empty of there physical gold to

fill orders. So many people have been requesting their physical gold now there is a run on the storage houses that supposedly store all this gold. The reason is: They don't have near enough gold to fill everyone's order for their gold.

And IF all this were not enough the grammy's just ended with a gay satanic orgy and where Katy Perry did a satanic ritual LIVE on stage for the world to see and where they gave an award to Black Sabbath for their new song " God is Dead" Get the picture. Now our youth are drenched with not only satanic symbolism but now with outright satanic rituals. What's next year? I predict they will do it in the nude and have satanic ritual sacrifice of children and drink their blood. That's what I am betting on.

Did you know that the minister who conducted the opening prayer to open the Democratic National Party got booed off the stage, NOT once but three times and finally gave up with out an opening prayer to open the Demonic I mean Democratic National Convention. Where, they elected Barack Obama a second term as our President. I knew then, our country was going down hill and FAST.

Christians are now considered Terrorist. What was good is now considered bad and what was bad is now considered good. It was not to many years ago that Homosexuals were considered sexual deviants, what changed? Was that for better or for worse?

The founding Fathers of our Nation are now considered Radical Terrorists.

Our Constitution and Bill of Rights have no real meaning any longer. Now with NDAA the Military or Police can arrest you, detain you, not file charges against you, not give you your Miranda Rights and not give you an attorney. They can hold you as long as THEY deem necessary. You have no recourse to sue, in fact you have no rights any longer at all thanks to NDAA.

The Fluoride in your drinking water is designed to make you domicile, more sterile and causes a host of other health problems including autism, brain anomalies etc. Fluoride is a waste by-product in the manufacture of aluminum. So now why is this (unapproved) drug (waste by-product) almost mandatory in our drinking water? WHY? I will take my fluoride in my toothpaste NOT in my drinking water where water treatment personnel (Not a doctor) prescribes how much fluoride you and your children get a dose of.

Or how about ChemTrails where high altitude military aircraft spray chemicals to make you sick, lethargic, with upper respiratory complications, flu like symptoms etc. You say "it cant happen here, this is America" But remember it was the Military in America which sprayed radioactive spray over wide areas of St. Louis after the war to just "see what happened". A normal jet trail dissipates after a few minutes but not so with ChemTrails they last for hours and sometimes they spray in a cross hatch pattern to get a better coverage.

Agencies of the Federal Government (IRS, FBI etc.) have become little more than Gestapo Officers in search of Conservatives to hound, herass and withhold tax exempt status (as much as possible).

Example: The last Government shutdown the Federal Government barricaded the WW11 Memorial on the mall in Washington DC. The Federal Government does not have anything to do with that memeorial but yet they barricaded the Monument. Making WW11 Veterans who broke through the barricade law breakers just to visit their monument.

In one of the many Executive Orders signed into law (by-passing Congress) Obama signed into law, making all of America a combat zone and making YOU Enemy Combatants with no rights in your own country.

What is coming to America will be nothing short of “Hell on Earth”. When the dollar collapses who would go to work for worthless paper, that will not buy anything. Everything will close even the power plants and that means NO POWER. And no power means NOTHING will work from cell phones, to flush toilets, no TV, no radio, the gas you have in your car will be all you have as the gas stations can't pump gas out of the storage tanks into your car with out power. No water and no sewer as water takes power to produce and to pump into your home and the sewer system has pumps to process the waste (which will back up into your home). You will have, no heat, no air conditioning, nothing will work. The cash you have in your pocket will be all you have as the ATM's will not work without power.

No money, no power means also you will not be able to go to your local Walmart and buy anything, like everything else they will probably be closed and IF you got their they would most likely already be looted of anything useful.

When I say No money I mean worthless paper money and without good money and fuel, the trucks will NOT be running, nothing will be on the freeways except military convoys and they will NOT have anything for you.

You say you are NOT convinced of this scenario. How about when Janet Napolitano upon leaving office as the Home Land Security Director, warned that America's Power Industry WOULD be attacked either by an EMP. (Electro Magnetic Pulse) This is what you get when you detonate an atomic device high above America and the EMP from such a device would render all electronics useless in America. Terrorist and Terrorist States such as North Korea are ready and have the capability of delivering such a device against America today. With such a scenario playing out we could be without power for 10 years, 20 years or never get it back like we have it today.

Another way our grid could go down is we could get hit with a CME from the sun. A Coronal Mass Ejection from the sun happens all the time but thankfully most of them are NOT in our direction. About every hundred years or so we get hit with a massive CME like back in 1859 (the Carrington Event) happened and was so powerful that telegraph equipment caught on fire. What do you think would happen today with our sensitive electronic equipment all wired together. A CME acts just like a EMP producing the same effects. Though a EMP is more local as in City wide, State wide or Nation wide but a CME can shut down a continent a Hemisphere or the whole world.

Now we have the third scenario of how we can loose power for a long term power outage (months to years). A terrorist attack, there are all kinds of terrorist, you have individual terrorist planning things, groups of terrorist working on ways to hack into power plants, generators, control systems, the grid etc. Then, you have State sponsored hackers working for such countries are Russia, China, North Korea, Syria, Iran etc. These are the most dangerous to us. Once these people get access to systems they install a small, little program that gets them instant access to do their damage at a future date.

Can you imagine the damage that can be done to America IF we were to loose power for a year or more? Several studies have been done in regards to this question and most agree to a 90% fatality rate IF America were to loose power for a full year. Only one study found a fatality rate of only 60%.

That is every other person you know dead. And if the power were to stay off you can bet you will achieve greater than a 90% fatality rate.

America is NOT an agriculture society and it will be quite impossible to support our population using horses to pull plows to plow fields to grow food for all of us. And even if we have our tractors where are you going to get the fuel to run the tractors? Since about 1968 or about this time ALL auto manufactures have built in computer control systems controlling everything related to the engine and this computer will be fried by a CME or a EMP rendering the vehicle useless. Not only autos, but trucks, big trucks 18 wheelers, motorcycles, tractors even generator motors running back up power in Nuclear Power plants, or as back up emergency power for hospitals nun of it will work or EVER WORK again. IF we are hit by a powerful CME or a high altitude atomic detonation producing an EMP all bets are off.

If we loose power long term what do you think will happen to our economy? Now matter how we loose power our economy goes into the toilet and our paper money ends up worthless. So, no matter how it happens, stock market crash, bond market crash, derivatives market crash, China economic collapse, Japan economic collapse, Europe economic collapse, CME, EMP, Terrorist attack on our power system. Also we are 16 Trillion in debt, we actually owe about 55 Trillion and with our Entitlements and Obama Care the bill comes to over 222 Trillion Dollars over the next 10 years. WOW where is that money going to come from?

Oh lets not forget the 200 Trillion Dollar derivatives bubble that's about to burst. Where is that money coming from? Since these financial institutions are to big to fail (or jail, I say) this money will come from YOU and ME! Remember the term "Bail In" you will hear it a lot more in the near future when they need YOUR money to bail out the banks they will simply TAKE IT.

Janet Napolitano warned us that we “will” loose power in America one day, one way or another. The ONLY way to counter this threat is to be prepared and to make your OWN power.

I have a web site that offers suggestions for most of these questions.
This site is at: <http://www.iplantosurvive.info>

So my investing strategy is a simple one. Invest in FOOD, WATER, WATER FILTERS, propane, a way to stay warm without your furnace. Have a way to cook food with out your gas or electric stove, a way to make your own power, a way to handle your human waste and a way to secure all your stuff in case you are overrun by marauding gangs.

My Second Investment strategy is if you live in a major city or it’s suburbs (GET OUT) as soon as possible. Move, relocate, find a family member who lives out in the country and get to be real good friends with them. If you have a Cousin who lives out on a farm so much the better for you and if they can see what is happening to America and the direction we are headed that will make things easier for everyone. Now you have a place where you can build up your preps and put in supplies, build up seed stock, raise chickens, goats, maybe cows etc. Now the question is when to leave for your safe house in the country (before it’s to late). Once martial law has been declared, there will be military roadblocks and who knows what they will allow through, anyone or anything unless it’s military. If you wait until the roadblocks go up you have waited to late and you may be stuck. Have bug-out bags for everyone, have everyone gassed up at all times and ready to roll out of town on a moment’s notice. Then when you hear on the news a False Flag event or Europe or Japan have collapsed you and yours will know it’s time to meet at a designated spot and leave from there to go to your safe house. Any safe house should be a minimum of 50 miles from any major

city and preferably 100 miles this will give you a buffer from any gangs roaming the streets and countryside searching for food, water etc.

My third investment strategy, for after you have adequate stores of preps for you, your extended family, friends, neighbors, co-workers etc. and IF you still have cash left over NOW and only now can you even consider Gold and Silver. Remember if you will need anything (ANYTHING) along the line of prep supplies, food, water filters, antibiotics, ammo anything and everything it will cost you a great deal MORE in the future, than NOW. Consider this: If a 50 lb. Bag of beans cost you \$36.00 now at Sam's Club how much will that same bag of beans cost you 6 months after the collapse, it may just cost you a gold coin a \$1,500 GOLD coin that may then be worth \$10,000. So I ask you what is the better bargain? \$36.00 cash now or \$10,000 later? I know this is hypothetical and the figures will most certainly be different, but could end up being more or less depending on where you are at, who you are dealing with and the going price of beans where you are at, at the time. I am saying even if you pay a gold coin that is worth \$5,000 that is \$5,000 for a bag of beans that would have cost you \$36.00 today.

Our Achilles heel is water. You need one gallon of water per day for each person you have with you. This can end up being thousands of gallons of water. The best thing you can do is to drill a water well and install a hand pump. Other than that I would suggest you buy a swimming pool at Walmart and fill it, treat it with chlorine (buy lots of extra Pool Shock to treat this water) and cover it to save for drinking and cooking. (remember, to filter this water BEFORE you drink it, with an appropriate filter that removes chlorine) You can also buy a couple totes (we recommend food grade and the black ones to keep light out as light will grow stuff you do not want in your water) and clean them out and store water in them and you can fill them from your gutter downspout if need be. Just remember to treat this water with chlorine when you store it, and always filter this also before you drink it. A good quality water filter that can filter thousands of gallons of water is most preferable. I recommend the Black Berkey water filter. I have instructions on my web site how to build the Big Berkey Table Top water filter. With the two filters it will filter 6000 gallons of water and with 4 filters it will filter 12,000 gallons of water. That is half the water I have in my swimming pool. Just because you have 4 of these filters do not think that is enough, when it comes to water filters the more the merrier. Another

good water filter is the ProPure water filter. You DO NOT want to run out of water filters. These filters will filter clean and drinkable water from ponds, creeks, lakes, swimming pools even ditches.

You do not want to invest in camping type water filters. The reason being these filters (as good as they are) are designed to filter only about 35 to 50 gallons of water and then the filter needs to be changed. These filters only cost about \$35 to \$70 but only filter about 50 gallons tops. Where you can buy a pair of ProPure or a pair of Black Berkey Filters and filter about 6000 gallons of water for about \$100 so now you tell me which is the better deal?

And yes you can safely filter and drink water from streams, lakes, ponds, swimming pools etc. with these ProPure and Black Berkey Filters. NO I do not get a kick back for recommending anything.

After you have tons and tons of supplies then you are ready to do some serious investing in Gold and Silver, RIGHT? Not so fast, ask 100 average people, have you ever seen a gold coin? I bet more than half have never even seen a gold coin. But you can rest assured they have heard about plated gold coins and fake gold coins. So the scenario is: You have thousands and thousands of dollars in gold coins, but who is going to barter with you, for what you need. And do they know gold coins from fake or plated gold coins. And another thing to consider, is if and when gold goes out of sight say \$10,000, \$20,000 even \$50,000 per ounce how can you now take that \$50,000 gold coin and buy/barter for a 10 lb. Bag of beans, when they will most certainly will NOT have change to give you other than worthless paper. Now what are you going to do?

Investing in Silver now looks better and better don't it? But hold on there are people out there who fake Silver Dollars and the fakes look good too. The answer is: junk silver dimes pre 1965, everyone knows they are 90% Silver and are never faked. Plus IF Silver goes to \$5000 an ounce that makes your single silver dime worth over \$350. Making it easier to barter with, easily recognized as money and never faked. And if you have to take

change just maybe you can barter something in with the deal (instead of taking worthless paper as change).

It is true the war years from 1942 to 1945 nickels were made of 35% silver but the problem with collecting them is a lot of people do not know these coins are silver and will refuse to give you anything extra for the silver content. As of early 2014 the silver nickel is worth only about \$1.00 and the silver dime is worth about \$1.43 (subject to change). The object is you can carry a lot more dimes than nickels and everyone knows your pre 1965 dimes are 90% silver.

I am not saying to never collect anything other than silver dimes. You can collect silver quarters also but I would avoid the silver half dollars. Some people know, but most do not know that the silver Kennedy half dollar from 1965 to 1970 was 40% silver. The value of these coins circulated is from \$5.00 to \$8.00. As I said most people think of silver coins as being pre 1965 only and will not give you anything for the silver content of your 40% Kennedy half dollars, so I would avoid them for that reason. The silver dollars are great but if and when silver hits \$5,000 an ounce good luck trying to barter with them and there will always be a question if they are real or not.

And even some say Silver bars are the way to go. OH really? Can you prove it's silver? Can you prove it's real? Can you prove the weight? A lot of questions with silver bars no matter the size or if they are minted with fancy artwork or not, there will just be too many questions with silver bars no matter the size, weight, purity etc. Personally I would avoid silver bars like the plague.

Wow, foreign silver coins are a big hit. They may be for some people. I guess you could do some Canadian silver coins and get away with it but probably not. Again someone will invariably ask: What is it? What does it weigh? How much silver is in it? And the biggie. **IS IT REAL SILVER?** More questions, too many questions for you to have to answer. **IF** you have to start answering questions about your silver like: Is it real? Is it fake? How much Silver is in it? (If you have to defend your silver, you already lost

in the trade and they will for sure take off the top for these questions which means you will loose in the deal.)

How about Gold Certificates or Silver Certificates. It is widely known that the Brokers who sell these Junk Paper assets instead of the real thing are selling you a fantasy. For every Ounce of Gold that is sold as a promise on a piece of paper, instead of the real gold, there are about 10 people who have a piece of paper with a legal claim to that same ounce of real gold and it's the same with Silver too. If you buy gold or silver, store the gold or silver under your lock and key or you don't really own it.

Silver and Gold mining stocks, may be hot right now and could be even hotter in the future. But keep in mind the benefits they pay are paid out in paper dollars. When the economy collapses the paper money will be worthless. So then how are you going to get paid anything on your mining stocks, if the currency is worthless. Remember, IF you don't own it, if it's NOT in your pocket or under your very own lock and key, YOU DON'T OWN IT AND PROBABLY NEVER DID.

Silver American Junk Dimes Pre-1965 are 90% silver, never faked and everyone knows they are 90% silver, no question. This will put YOU in the drivers seat. This coin will be in demand and wanted without question. And IF you are bartering for something costing (say \$200 in silver) and you have a dime worth \$350 you just might take something else in trade for your change instead of taking worthless paper. Better for you, better for them. Everyone wins when you are trading with 90% silver dimes and 90% silver quarters.

If you want to know what is coming go to Youtube.com and search for, Vision of the End of the World (Sarah Menet, 1979, NDE)
Sarah Menet in 1979 had a Near Death Experience during which she was taken on a tour of the future of the world and America and the calamities which would befall us. Most striking was the twin towers in New York falling down in flames, but she was not shown how they would fall only that they would fall down, and they did on 9-11-2001. Much of her story is gruesome dealing with our economic collapse and how people in America

I don't know the countries of the world very well, but as I looked at these lands I instinctively knew what countries they were. I was looking at the Middle East and watched as a missile flew from Libya and hit Israel with a big mushroom cloud. I knew that the missile was actually from Iran but people from Iran had been hiding it in Libya and fired it. I knew that it was a nuclear bomb. Almost immediately missiles started flying from one country to another, quickly spreading to all over the world. I also saw that many nuclear explosions did not come from missiles but from ground bombs of some kind. I knew that in the future there would be a nuclear war throughout the world and this is how it would start. Then, my focus changed from the Middle East to America. I understood that I was about to see some of the things that would lead up to the nuclear holocaust I had just witnessed. As I looked upon the continent of North America, I zeroed in on the East Coast and then to New York. I saw New York with all of its buildings and people. Then I saw some tall buildings crashing to the earth with tremendous smoke, debris and dust everywhere (World Trade Towers?). I saw a woman holding a little girl's hand, running from the crashing buildings. The lady had long dark hair past her shoulders, curled inward a little. She had on a beige business suit, heels of a slightly darker color, perhaps a tan color. No glasses. The little girl appeared to be about 6-7 years old with short brown hair, below the chin, in a sort of a pageboy haircut. They were holding hands and running together from the falling buildings in the heavy smoke and dust and they were forced to let go of hands and thereby they got separated. The little girl was terrified and I could hear the little girl screaming "mommy, mommy" over again and again. I don't know if they lived or died. I can still see the face of the lady clearly and could identify her if I saw a picture...or could describe her to an artist to draw her. I asked if an earthquake caused the buildings to fall down and the impression was 'no,' but I don't know what caused them to fall.

The next thing that I felt more than I saw was that shortly after this there was no commerce, no shopping, buying, and was impressed that there was no economy. The economy had almost failed completely and no one had any money.

The next thing I saw was people being sick and dying. I saw this particularly in four cities: New York, Los Angeles, San Francisco and Salt

Lake. The disease started by having white blisters, some the size of dimes appear on their hands, arms and face. This quickly developed into white puffy sores and blisters. People would stumble about and fall and then many died within a short time, maybe 24 hours. I also saw other people with blood coming from their nose, mouth, eyes and ears. It started like a flu virus and it spread very quickly, faster than the other white blister disease. The people who had this disease died even faster. This was more wide spread across the entire United States. There were hundreds of thousands of people stricken with these two diseases.

I knew that the diseases, and there were several different kinds, but at first primarily these two, came from small containers that had been brought into the United States. These containers were like quart jars and I was impressed that the people carrying them would just drop them on the ground in large crowds of people and the people would become infected without realizing it.

In these cities as the disease spread, the people tried to flee from the cities out to the countryside. There was complete chaos in these cities and a breakdown of normal society. There was no electricity in them either, but I don't know why or how that came to be. There were cars piled up everywhere, blocking roadways and most people then had to walk out with nothing. The disease started to spread beyond these initial cities.

As these people were fleeing the cities, there were gangs attacking them and killing them. In the cities that were struck with the disease, there was complete chaos, looting, rioting, murdering, a complete breakdown. Many people seemed to go absolutely crazy. I sensed that the electricity had failed everywhere now and that nothing was running, there was no communication or anything anywhere in the country. Nothing worked, no radios or TVs. I watched people throw rocks and break windows to steal TVs which I thought was really crazy because they wouldn't work.

Immediately, as I watched this happen in the United States, I jumped back to the Middle East and saw the same thing in Israel, the same sores, and I realized that it was the same types of disease or sickness happening there. I

knew somehow that whatever diseases had been used in the United States were also being used in Israel. This lasted for only an instant and I was back in the United States. There was a tremendously long winter that lasted into summer. It caught everyone by surprise and started the full famine. Actually, I realized that the long winter actually just increased the famine greatly to its full measure, because the famine had already been in progress because of the storms, droughts, floods and other plagues that had been happening over the few years leading up to the long winter.

It seemed then that the year following the long winter was when everything started to go down hill very quickly or things piled up one on top of the other without any breaks. The sense of time though was not very clear because I was seeing several things that seemed to happen all at the same time or very close together.

During and after the long winter, the disease spread everywhere and increased in severity. The economy was completely gone and the electricity was also gone. There was complete chaos and anarchy all over the United States. There was no government, just a total breakdown. There was no food at all. I saw people trying to get food and were completely panicked because there was no food. I saw people digging in the ground for worms and eating them because they were so hungry.

Also, during this time I became aware that there was very little water and that almost all of the water had become poisoned so that if a person drank the water they would get the disease and die. Many did even knowing that they would die, because they were so thirsty.

Some of the people seemed to go crazy and went around in gangs killing people just for the sake of killing. Others killed for food or for things but the people who killed just to kill were absolutely terrible. They seemed like beasts, animals completely out of control as they raped, looted, burned and butchered people. I saw them go into people's homes and drag families out who were hiding there and rape them and butcher them.

There was such a fear and hatred that came upon the people -- families, wives, husbands -- loving ties no longer mattered; it became survival only. Husbands would kill their wives and children for food or water. Mothers would kill their children. It was absolutely horrible beyond description. The air seemed to be filled with smoke as many buildings and cities burned and no one put them out. As I looked upon the scene of chaos, destruction and smoke, I noticed that there were these little pockets of light scattered all over the United States. There were, I would guess, about twenty or thirty of them. I noticed that most of these places of light were in the western part of the United States, with only three or four in the East.

These places of light seemed to shine through the darkness and caught my attention and so I concentrated on them, asking, "What are these things?" I could then see that they were people who had gathered together and they were on their knees and they were praying. The light was coming from them and I understood that it represented their goodness and love. I understood that they had gathered together for safety and that they cared more for each other than for themselves. Some of the groups were small, with only a hundred people or so, but in other groups there were what seemed several thousand.

I realized that somehow many, if not most of these cities of light had been established just before the disease attack and that they were very organized. It was like they had known what was coming and had prepared for it. I didn't see who or what had organized them, but I saw many people struggling to get to them with nothing but what they could carry.

These cities of light had food and were sharing their food with those who joined them in their groups. There was peace and safety in the groups. They were living in tents, all kinds of tents, many of which were just blankets covering poles. I noticed that the gangs left these groups alone, choosing to pick on easier targets and unprotected people. They also preyed on the people who were trying to get to the cities of light. Many people in these cities of light had guns to defend themselves with and so the gangs left them alone but it seemed that the gangs just didn't want to come against them. I realized that these cities of light, which is what I began to think of them, were only for a short time and then the people in them would go somewhere

else; however, I don't know where they went but I seem to think that they gathered to the mountains, to the high places.

As I was looking at the cities of light, I then saw missiles coming and hitting some cities and mushroom clouds started happening all over the United States. Some were from missiles that I knew came from Russia and others were not from missiles, but were from bombs that were already in the United States. They were hidden in trucks and in cars and were exploded.

I specifically saw Los Angeles, Las Vegas and New York hit with bombs. New York was hit with a missile, but I think that Los Angeles was hit by a truck bomb or actually several, because I didn't see any missile. I also saw north of Salt Lake City have a mushroom cloud, a small one, but no missile. In the darkness I also saw little fireballs. I don't know if this happened just before or during the mushroom clouds, but there were millions falling everywhere. They were very hot, of different sizes with most about the size of golf balls. As they fell from the sky they left a streak of flame and smoke behind them. Whatever they touched they started on fire: people, buildings, trees, grass, it didn't matter. I didn't ask what they were or where they came from, because by this time I was getting sick of the whole scene and so I just observed and didn't ask many questions.

Almost right on top of these mushroom clouds I saw Russian troops invading the United States. I saw them parachuting into a lot of places, primarily from the East Coast. I saw them parachute into Salt Lake City. I also saw Chinese troops invade from the West Coast, near Los Angeles. The people who were still alive started fighting them with their own guns. I didn't see any military.

This was the nuclear war that I had seen earlier and I knew that it was also happening all over the world like I had seen previously. I did not see much of this war, but I was impressed that it was not very long and the Russians and Chinese lose, but I don't know how exactly.

Now the smoke turned to a very thick, heavy dark smoke. Just as things appeared to be as bad as it could get, then the earthquakes happened. This happened during a winter. It seemed that this was the winter following the

very long one and so the chaos had been almost for a full year. The earthquakes seemed to start in the West, around Idaho and Wyoming, and then quickly spread everywhere.

I saw a huge earthquake strike Utah and then California. There were earthquakes all over California, but were especially devastating in the Los Angeles and San Francisco areas. These earthquakes triggered volcanoes all over the West. They started spewing a tremendous amount of ash and smoke into the air and the air became very dark and dirty. The sun was darkened even more because of the smoke and the ash that started raining down everywhere. I also saw huge waves of water sweep over the West Coast and then I realized that it was happening all over the coastal cities of the entire world. Los Angeles was almost swept completely away. The waves were huge.

I saw a big wall of water, taller than many of the buildings, perhaps as high as 20 feet, sweep over Salt Lake City. I thought this was strange because it was so far from the ocean and I wondered how a wave from the ocean could travel all the way to Salt Lake City. I was impressed that it was not from the ocean but from the ground. I quickly saw great cracks in the earth around Salt Lake City open up and water just shoot out of the ground. I felt that under the ground, very deep, there was a tremendous amount of water in the ground and the earthquakes forced it up to the surface. When the water swept over the city, there weren't very many buildings left, in fact there was a tremendous destruction with hardly anything left at all, just a few buildings. The water went from Idaho down to near Cedar City and was very bad. In the cities there was great destruction, and most of the buildings had been destroyed and there was a lot of rubble. Though the earthquakes, disease, floods, volcanoes and tidal waves killed a lot of people, most people died because of the gangs and everyone killing each other, not from the terrible devastation's.

As I thought a moment about it, it seemed that the earth itself had become sickened at the terrible things that were happening upon it and was finally reacting. I was impressed that the earth wanted to cleanse itself of the terrible chaos and evil that had engulfed the people.

Because of the volcanoes erupting everywhere, there was now ash mixed with the heavy smoke. Ash was falling and it was almost complete darkness everywhere. The diseases had become very bad. I saw people literally die on their feet. There was another disease I saw. People had these red blotches on them and then they quickly started bleeding everywhere, from every opening. Then, they literally disintegrated or melted into unrecognizable masses of flesh and bone. I cannot even begin to describe what I saw. The dead were everywhere. After this terrible winter, I saw the survivors pile up the dead into huge piles and burn them. The smell was absolutely terrible. I could smell it just a little and the smell itself would make you sick. This burning of bodies had happened a little during the chaos, but not much because people were so worried about surviving that they just ignored the dead.

I then saw four more things.

I saw a huge earthquake in the middle of the United States. It was tremendous and seemed to split the United States in half about where the Mississippi River is. The crack in the earth that resulted was huge and that area totally sank. It was miles wide and it opened up and the earth fell down. It seemed to swallow everything. Then water flowed in from the Gulf of Mexico all the way up to the Great Lakes, only they weren't lakes anymore, they became all part of a big inland sea.

I then saw a series of tremendous earthquakes all over the world. But it wasn't lots of separate earthquakes, it was all part of one huge, gigantic earthquake that shook the entire earth. Because of this earthquake, water came upon the land all over the world. Huge walls of water along all of the coasts. This earthquake and the walls of water made the earlier ones seem small by comparison. I don't know if the earthquake that split the United States into two parts was part of this worldwide quake or not.

I then saw a tremendous wind come upon the earth. As the wind hit I saw people go into caves and into the cracks of rocks to escape it. It was tremendous and it blew trees and everything away. It appeared to be stronger than any hurricane or tornado. It seemed like everything was blown away.

I understood, without asking, that the great worldwide earthquake and the wind were somehow caused by a huge object, like a planet or something, that had come very close by the earth and disrupted everything and that it was near the end that this happened.

I then was back into space viewing the entire earth from a distance. I saw this huge fireball, two or three times bigger than the earth, approach the earth. It was extremely bright red and gold in color and then engulfed the entire earth. When I saw this, because it was so different than everything else, I asked what it was. I was impressed that it was the burning of the earth that is described in the scriptures. I understood that just before it came Jesus had appeared to the earth and the good people that I had seen earlier had left the earth with Him and were no longer on the earth. The only people left were the few wicked who had survived the devastation's earlier, but there were not many. Sarah Menet, 1979

I can not tell you if Sarah Menet's vision of the future is correct, but she has been correct so far. All I can say is let your conscious and your faith in God be your guide. All I can do, I have done, all I can do now is to pray.

God be with you and yours
